Make a Story Together

PACK 2 / Tourette syndrome

INSTRUCTIONS & ADAPTATIONS FOR ADULTS

Short, supported play for children aged 3-5. Model, pause and let the child choose how to join in.

What you need

Two toys and picture scenes.

Getting started

Set out a couple of toys and one scene.

Try it together

1. Choose a character together.
2. Move a toy or add a picture to start a story.
3. Let anyone contribute with words, pointing or actions, without timed turns.

Choices and adaptations

- Do not require speaking on cue.
- Allow movement and noise.
- Join or leave the story freely.
- Use a partner to move objects if preferred.

How to keep it playful

Offer choices without checking for a correct response. Point, demonstrate, wait and follow the child. A little play is enough.

Safety: Never draw attention to involuntary movements or sounds.
